That sounds good to me. I can pass the outline along to Jody. What is the timeframe on this??

Hi guys,

I heard back from Mike Koerber on what OAR is looking for in terms of a Uinta Basin presentation. See his outline below. I thought they'd be mostly interested in NEPA but that appears to be only one piece. I'd suggest that we have Jody start pulling this together and coordinate with the appropriate Air Program folks for each topic. From my unit, she can reach out to Chris for NEPA and work with Kyle on "Tribal interests" (but I'm sure she knows enough about that topic on her own). Let me know what you all think.

Thanks,

Scott

Scott Jackson, Unit Chief

Scott – Sorry for not responding sooner to your voicemail about the Uinta briefing we requested. Here is an initial outline for your consideration. We can talk next week about this, as well as timing (later in June?).

- I. Overview of current air quality and challenges (wintertime ozone)
- II. Tribal interests
- III. CAA regulatory activities
 - a. State and federal permitting programs
 - b. Significant new source issues – e.g., Deseret
 - c. Proposed FIP for existing sources (VOC controls for ozone purposes)
 - d. Regional haze issues

IV. NEPA activities

I'm sure I've left out something important here, so feel free to modify, as necessary.

Mike
